ABOUT ME

What do you want to know?

I love computers and technology. I tinker with my own PC quite often and I love messing with/keeping up with new technology as it becomes available.

Video Games are an inspiration. A balanced game can often times be just as inspiring design-wise as it is entertaining. I love a game that not only engages mentally, but visually, too.

Bacon Cheeseburgers. It is on my bucketlist to try the best Bacon Cheeseburger in the world. So far, Litton's Market in Knoxville, TN takes the crown. Maybe you know of a better one?

Graphic Design really is my passion. It's how I express myself. I do try to achieve a good work/life balance, but you'll find me experimenting quite often, especially when I am inspired!
